### IN A POST WAR WORLD

At the present time, the thought of nations and individuals seems to be focusing on the Post War World, and the conditions that will exist there. Committees are set up in provinces, nations, organizations, and some of them even international in scope, in an effort to map a plan for the future that will be workable.

Before any future successful plan can be evolved it goes without saying that the mistakes of the past and present must be discovered, aired and altered, not put back into the

new plan. All seem to be agreed that Greed and Selfishness, individually, in organizations and in nations, is the primary cause of the present world upset. If so, what is the future going to hold in this respect? Can a plan be worked out that will be fair to laborer and employer without putting teeth into the controls of it so that it will have to work? And if teeth are put into it, can it be done so that everyone concerned will feel good about it? Can employer and employee come to a working agreement where both will feel satisfied, or will bickering and fighting about hours and wages still continue?

Many people maintain that the cause of all feeling is misunderstanding. If so will business, large and small, take labor into its confidence, and show them by actual figures what the business is doing and how much they can afford in wages, bonuses and subsidies. Employers today, are not dealing with uneducated men and women whose only interest in life is a full stomach and a place to sleep. They are dealing with people

whose aims for nice homes, wholesome surroundings, education, and a permanent security for old age are as vital as their own. They are dealing with human beings who think and feel as they do, and who can be reasoned with and appealed to from any fair and square approach. When labor is treated as a partner in business instead of just a cog in a great wheel, then there will be some hopes of peace and happiness in the world. As long as they are badgered by a class who try to elevate themselves above the men and women who do the work that makes the wheels turn, we will have trouble. Why? Because the laborer is just as worthy of respect as the executive, and the fact that the work done demands overalls and heavy shoes instead of a light suit and fine shoes, is no disgrace to the ones who do the work.

Our committees can do all their time working on plans for our future, but if the spirit of equality and fair play is left out, they simply will not work with individuals or nations. If we set out to apply the Golden Rule of "do unto others as ye would that others should do unto you" we have hope. If we continue, as we are now of "do the other fellow before he does you," we are simply wasting time. If governments and com-

mittees work from this point to start a great deal of time, money and effort will be saved. JOIN THE AIR CADETS NOW Have you bought your bond? If not, get busy and do it NOW.

Want Normal Pop, Vim, Vigor?

Try Outrex Tonic Tablets. Contains tonics, stimulants, iron, vitamin B<sub>1</sub>, calcium, phosphorus, aids to normal pop, vim, vigor, healthy after 30, 40, or 50. Indispensable also only 15c. If not delighted with result of first package, make refundable loss price. At all drug stores. Start taking Outrex Tablets today.

### THE LITTLE SHIPS

By Earl Simonson  
The harbor's full of little ships;  
On either side they lie,  
With their noses pointed at the tide  
And their booms against the sky;  
And maybe it's a brigantine  
And maybe it's a bark.  
But mostly it's a steamer-tramp  
That's gone upon a lark!

Across the oil water,  
Their gunwales weighted low  
As down the bay they go,  
You see them in the evening  
With their decks all neat and shipshape,  
And some pretty signal flags,  
For when a ship puts out to sea  
She dons her Sunday rags!  
And it's "England, England,  
England!"  
The little ships all cry,  
For she's their lady mother,  
And they will not let her die.  
For England is in trouble  
But the little ships are true,  
So the little ships go dancing,  
And the sea, she dances, too!

FEED POULTRY AFTER  
4 P.M. IN WINTER

Warmth is an important factor in egg production. Correlated with warmth is feeding and the time of feeding. Nature has equipped poultry with ample storage space which includes the crop, gizzard, and stomach. The gizzard with its strong muscular walls, may be likened to a power-plant. It generates heat in the bird when the crop is full of reserve feed. Thus the bird is kept warm, while the feathers keep the cold out. But the internal heat is dissipated during the night and in the case of poultry not fed after 4 p.m. the store of fuel is exhausted before the time it is most needed during the coldest hours of the night in the early morning. Late feeding is a good system. An example is quoted of a poultryman, who with only a medium flock, was able to maintain good egg production by feeding late. He had no electric light in the poultry house but the birds came down to feed by the light of a lantern. Late feeding of hard grains in conjunction with the use of light in poultry houses stimulates poultry to produce more eggs. More egg production is urgently required to meet wartime demands.

## Borrow, If Necessary, To Raise More Food

Farmers raising war foods, supplying all kinds of products for export to the fighting fronts, may find it necessary to borrow at the Bank to cover their extra requirements.

It is the policy of the Bank of Montreal, at all of its branches, to co-operate at all times with farmers, and especially at the present time when their work is so essential to the war effort.

Do not hesitate to talk in confidence with our nearest branch manager regarding your need for credit.

### FARM FOR VICTORY SURPLUS FARM LABOR REQUIRED

The manpower problem is becoming more acute as the war progresses. Many essential industries such as mining, lumbering, and meat packing are sorely pressed. Many of these industries require more men in winter and can use farm help which may be released from the farm in slack seasons.

Under the Dominion-Provincial Farm Labor Agreement, arrangements have been made to recruit men who can be spared from the farms to work in other essential industries. Although most farmers feel that they have earned (and justly so) a little holiday that the slack times offer, they should realize two things: First, unusual demands are being made of all of us to keep the war effort and, Second, it is to the farmer's own interest to keep up such industries as lumbering and meat packing running normally. The slack market in livestock at the present time and hence a depression of prices is traceable, at least in part, to the lack of help in the packing plants. Edmonton packing plants alone require 800 workers. Animals are crammed into the yards waiting to be slaughtered and processed.

Every man who can leave the farm should get in touch with his District Agriculturist or a member of the Farm for Victory Committee in his district. Men who are on a military post placement as farm workers will not prejudice their position by taking employment in essential industries, providing they notify their Mobilization Board and go through the proper authority. Any farmer leaving the farm for other industry should obtain a permit from a District Agriculturist or local labor representative.

Every farmer or farm worker who can be spared is urged to contact the District Agriculturist, Municipal Secretary, Farm for Victory Committee or local Labor Representative at once.

W. A. Anderson is the local member of the Farm for Victory Committee.  
FALL CARE OF SMALL FRUITS

The past season has been an exceptionally profitable one to the growers of small fruits. This is particularly the case where the growers of strawberries mulched their planting over the winter of 1942-43 and had their raspberry canes well protected. The following suggestions from P. D. Hargrave, Provincial Horticultural Station at Brooks, will be of interest to all growers of small fruits.

Strawberry plantings should be lightly mulched during the next ten days and later covered so that they will have at least 6 inches of mulch before the snow comes. Rye straw is the best mulching material and is followed in order by: First cutting of alfalfa, slough grass and wheat straw. Never use oat straw or other material that might rack and smother the plants.

Raspberries can have the old canes removed at this time but do not prune back the new canes until spring. The canes should be bent down and covered with brush or soil before the ground freezes. Frequently raspberry canes are difficult to ripen because of excess fall moisture. If there is sufficient moisture, do not cultivate after August 1st. This will hasten maturity and leaf fall. After the leaves have fallen, the land can be cultivated and if possible irrigated.

Currants are the only fruits that can be pruned in the fall and in order to lighten spring work it is advisable that this be done. Cut out the old wood and the weakest of the new growth until twelve main stems with their branches are left. These 12 stems should consist of 3 one year old, 3 two year old, 3 three year old and 3 four year old canes.

### NEW ROAD LINKS IN 1944 SEASON

Motorists will have the advantage of new road links being opened for the 1944 season, according to information received by the Alberta Motor Association.

Recently it was announced that work is proceeding on the construction of a motor truck road on the Jasper highway to open a new route to Vancouver by way of Blue River and Kamloops. This is expected to be nearly completed this fall.

The B. C. government has announced that surveys have been made and it is expected that work will start this year on the construction of a road

Exchange your BLUE RIBBON COUPONS FOR WAR SAVINGS STAMPS

**BLUE RIBBON COFFEE** — A Quality Product Moderately Priced

to link with the Alaska highway, in the Peace River district. This may run from Prince George or some point further west.

A new highway also is to be completed to improve the motor ing facilities on the Alberta-Saskatchewan boundary, south of Lloydminster. Under an agreement between the two provinces, the Meridian road will be reconstructed and put in proper shape.

Thus, east and west, efforts are being made to improve the motor roads, despite the requirements of wartime emergency conditions, as it is recognized that war needs must be given precedence in these times.

### JOIN THE AIR CADETS NOW

The M Men and Gleaners of the 2nd Ward held a Halloween party Tuesday night after their class, making it a costume ball. It is reported that some really rousing dress and make ups were on parade.

Director, Agricultural Department  
North-West Line Elevator Association

### AVOIDABLE LOSSES

Grain Inspection Branch figures for the period August 1 to October 15, reveal a serious situation which involves heavy losses to the farmers concerned. We refer to increases in 'smutty' and 'rejected' wheat.

#### Smutty Wheat

With rare exceptions, which need not concern us here, all smutty wheat results from stinking smut (bunt). In Hard Red Spring wheat and Durum, this disease can be completely controlled by seed treatment. On October 14, the Wheat Board Price List provided for a discount of 10c per bushel for smut in grades No. 1 Hard to No. 4 Northern. Since August 1, 101 cars have graded smutty; a frequency five times as great as last year. The loss to the farmer is nearly \$200.00 per car.

#### Rejected Wheat

'Rejected' gradings have increased at an alarming rate this season, though most of the wheat so graded was probably grown in 1942, when harvest conditions were unfavorable. Aside from ragweed, most rejections are due to excess moisture resulting in heating and sprouting. The discount for grades No. 1 Hard to No. 4 Northern is 11c per bushel—a serious loss. Since August 1, 329 cars have graded rejected; they are three times as common as last year. This loss cannot be eliminated, but it can be greatly reduced.

Write to us, or apply to the nearest line elevator agent for the following "Seedtime and Harvest" articles:

1. "Tough Grain" (by Dr. K. W. Neathy)
2. "What We Have, We Hold!" (by Dr. B. N. Smallman).

## For Men All Weights Made By Hanson BREWERTON'S

### EGGS AND POULTRY

Poultry farmers in Alberta have been working harder according to statistics made public by Premier Manning, Minister of Trade and Industry. Covering the first seven months of 1943, the report shows that they marketed more than 11,455,000 dozen eggs, half of which were shipped out of Alberta. This means an increase in production of 78 per cent over the same period of last year.

Poultry production increased only 6 per cent in the seven months but the increased value of dressed birds made an increase of 42 per cent in sale price. Poultry marketed weighed 2,187,000 pounds and was valued at \$622,169. That makes the average price a matter of 28½ cents per pound.

## Guides Governor General

WALTER NIXON, veteran "mountain man", Canadian Rockies guide and rancher, guided the Earl of Athlone and Princess Alice on their hunting trip through the East Kootenay area during which the Governor General brought down a large mountain goat.

Walter Nixon, pictured above, is one of the best-known guides for big game hunting on the western slopes of the Canadian Rockies adjoining the Simpson Summit and Mount Assiniboine, which districts he traps during the winter months.

Originally from Ontario, Guide Nixon has ranged in the Upper Columbia Valley, B.C., for almost forty years; has been a game warden in that area and in the Kootenay River and Leanech districts.

In addition, he was one of the founders and charter members of the Trail Riders of the Canadian Rockies, an organization now world-famous, and one which has brought great happiness to hundreds of lovers of the Great Outdoors.
